

Positive Referral System

Rock Springs Middle School Rutherford County Schools

Rock Springs Middle School has seen exciting results from their Tier I system. Specifically, they have seen an increase in positive office referrals and a decrease in office discipline referrals. They attribute this success to a shared agreement by their staff to focus on the positives and implement their Tier I system with fidelity. A positive change in both student and faculty attitudes has led to a change in school culture. Students are excited and want to be at Rock Springs Middle every day.

Students exhibiting positive behavior and following school-wide expectations earn tickets which can be used at their school store, Knights Castle. Students can also be acknowledged by receiving a positive office referral. Rock Springs utilizes an online program for their referral system. Staff members can collect and analyze data, as well as communicate with stakeholders through the platform. When a staff member logs a positive referral, students and family members are able to log in and see what has been written. Rock Springs Middle believes their Tier I system has had a positive impact on their students lives, as well as an impact on their school culture and climate.

Ready at The ROCK

Classroom Expectations
